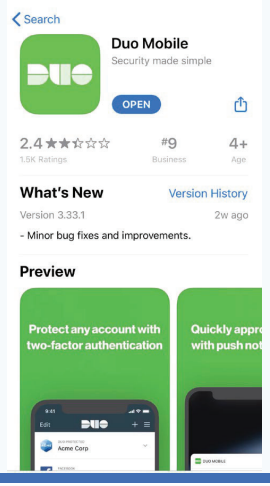
precisionFDA

1 – Install Duo Mobile Multi-Factor Authentication (MFA) App.

On your iPhone or iPad, search the App Store and install Duo Mobile.



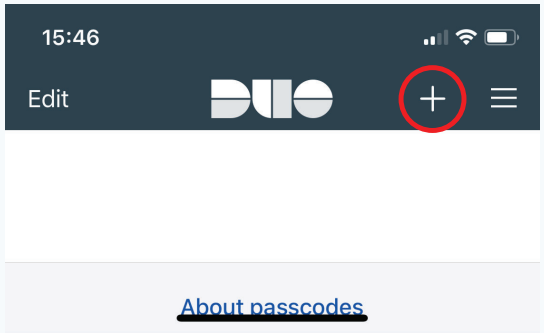
Or, on your Android device, search Google Play and install Duo Mobile.

precisionFDA

2 – Open Duo Mobile on your mobile device and add an account.

Open Duo Mobile on your mobile device.

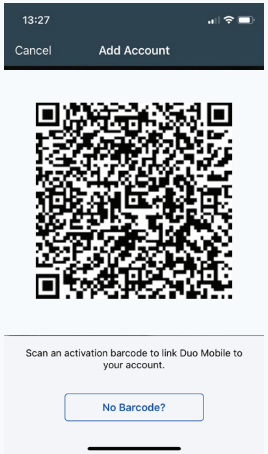
Click **+** on your mobile device to add an MFA account.



precisionFDA

3 – Scan the QR code with your camera.

Point your mobile device camera at the activation barcode presented on your screen.



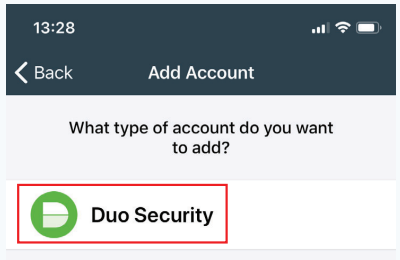
If the barcode isn't automatically recognized by Duo Mobile, click *No Barcode?* on your mobile device, and click NEXT below.

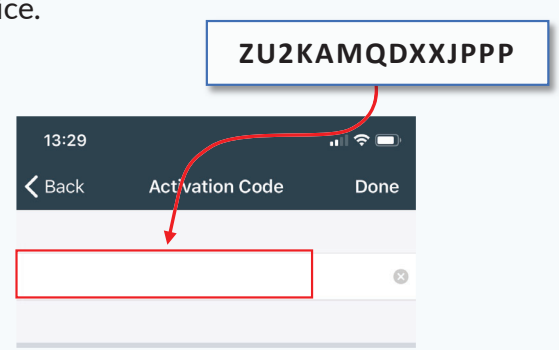
precisionFDA

4 – Optionally, enter a manual activation code.

If you successfully scanned the activation barcode, skip this step.

Otherwise, select *Duo Security* as the account type and enter the manual activation code shown here on your mobile device.

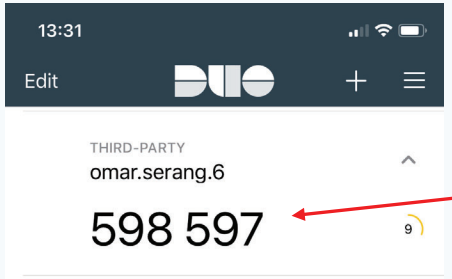




precisionFDA

5 – Verify your MFA account setup.

You should now see your new MFA account on your mobile device.



Enter this token from Duo Mobile to verify the MFA account setup.

precisionFDA

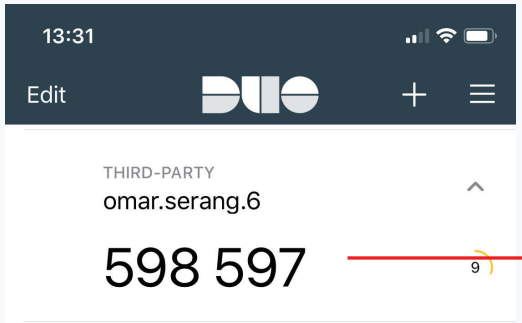
6 – Save your MFA token backup codes.

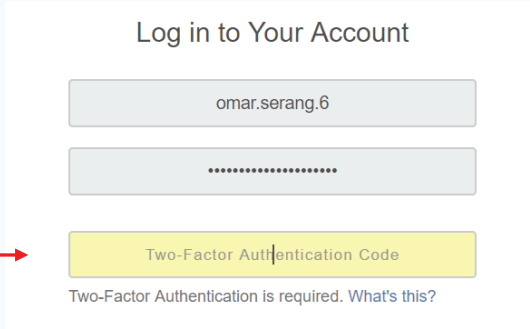
Please copy, download, or print to save the MFA token backup codes. You can use them to logon to precisionFDA if you don't have access to Duo Mobile.

The codes will disappear after you click to proceed.

precisionFDA

7 – Login to precisionFDA using your new MFA account!





If the MFA setup was not successful, please [contact precisionFDA support](#).
